

Assignment No. 2

Course Title:	Web Technologies
Submitted To:	Sir Usman Akram

Assignment 1 — Your Personal CV Page

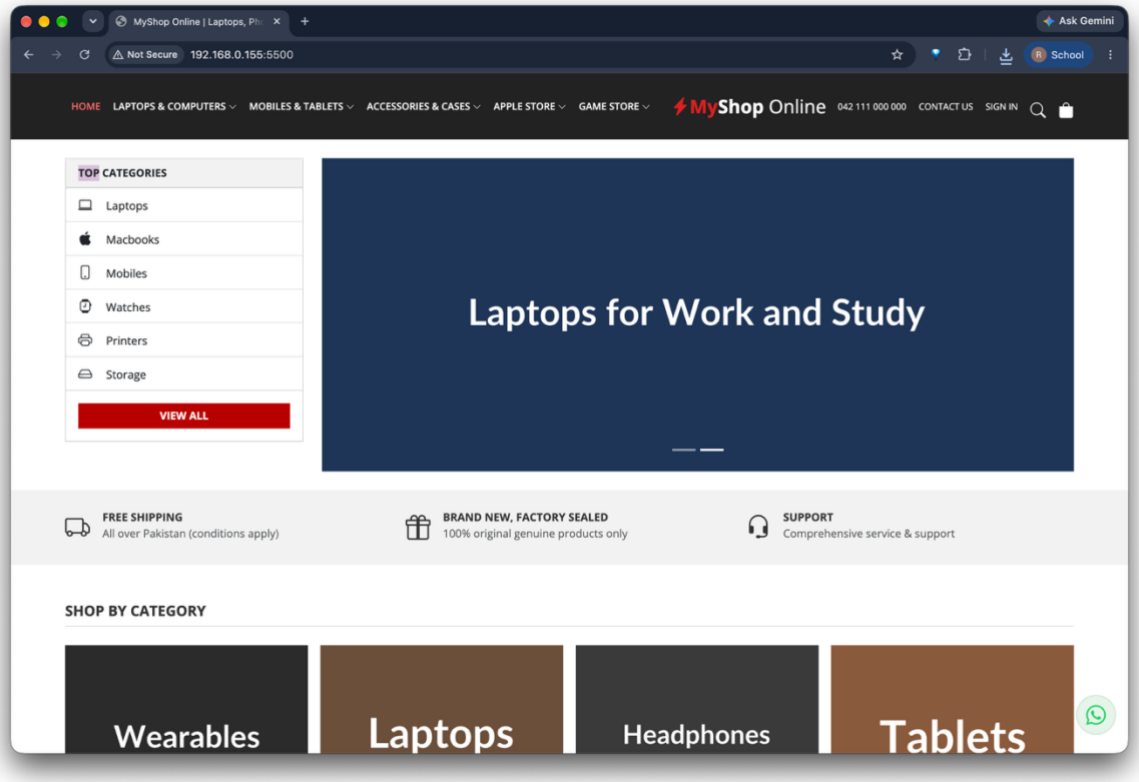

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** `assignment-1/`

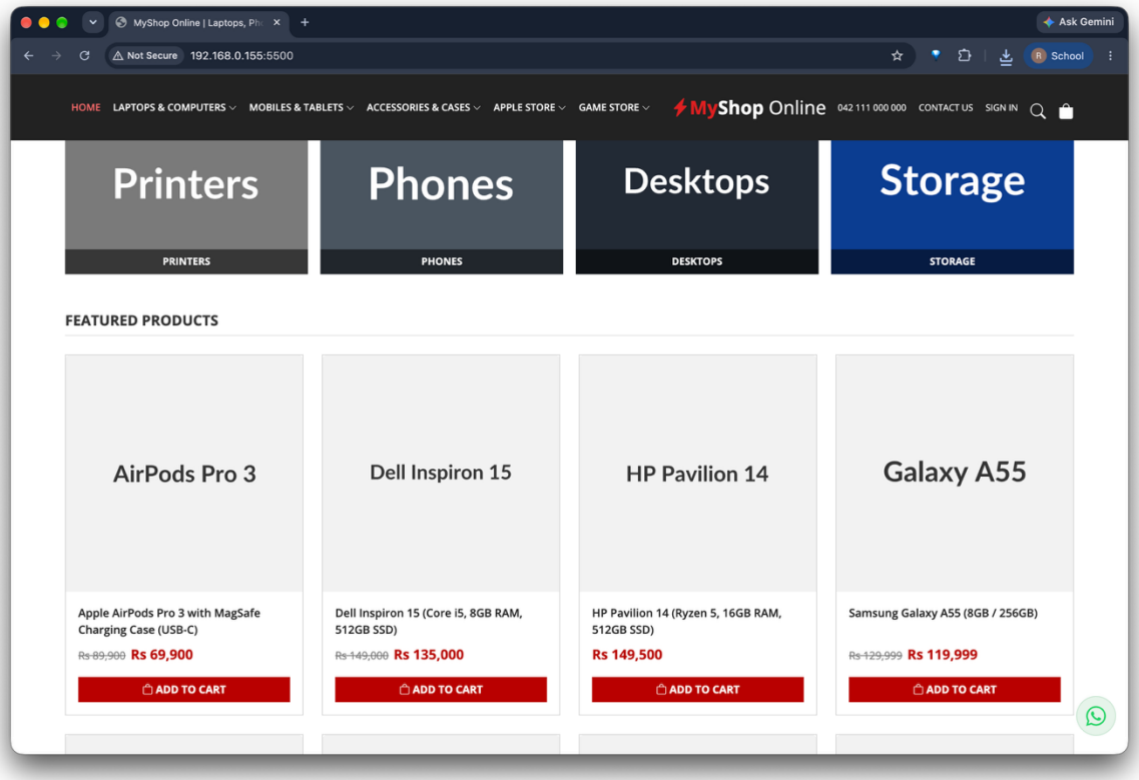

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

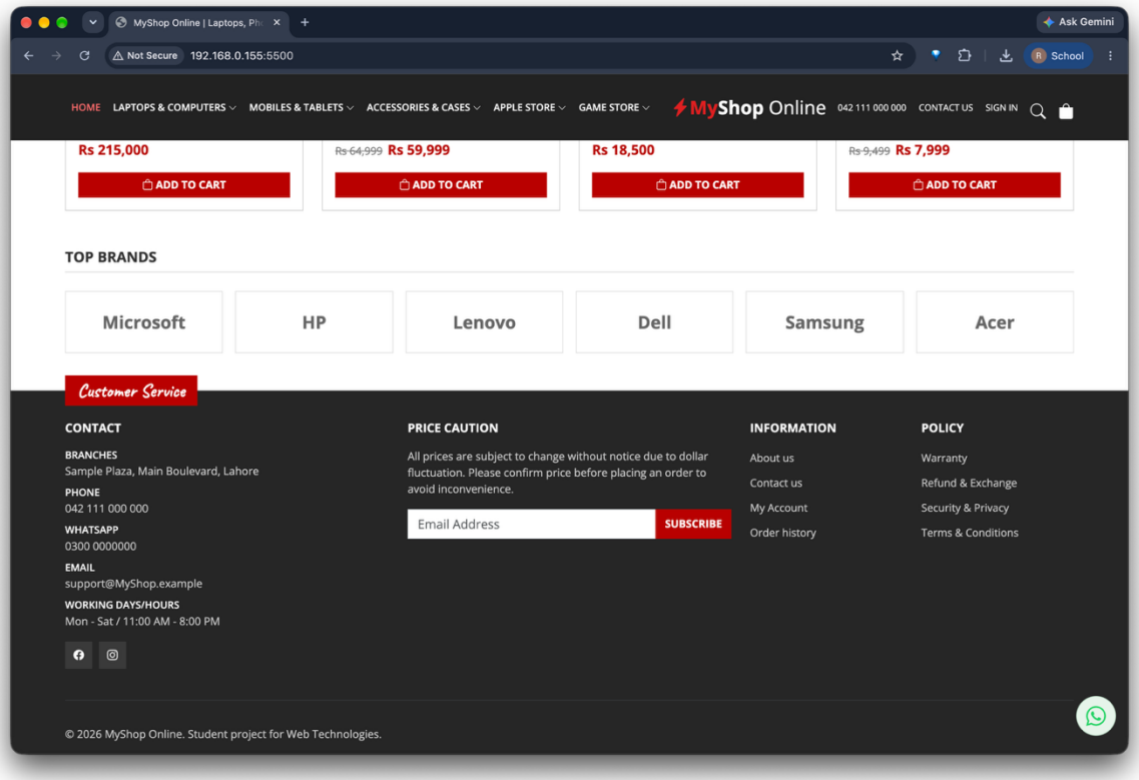

Your page must include, at minimum:

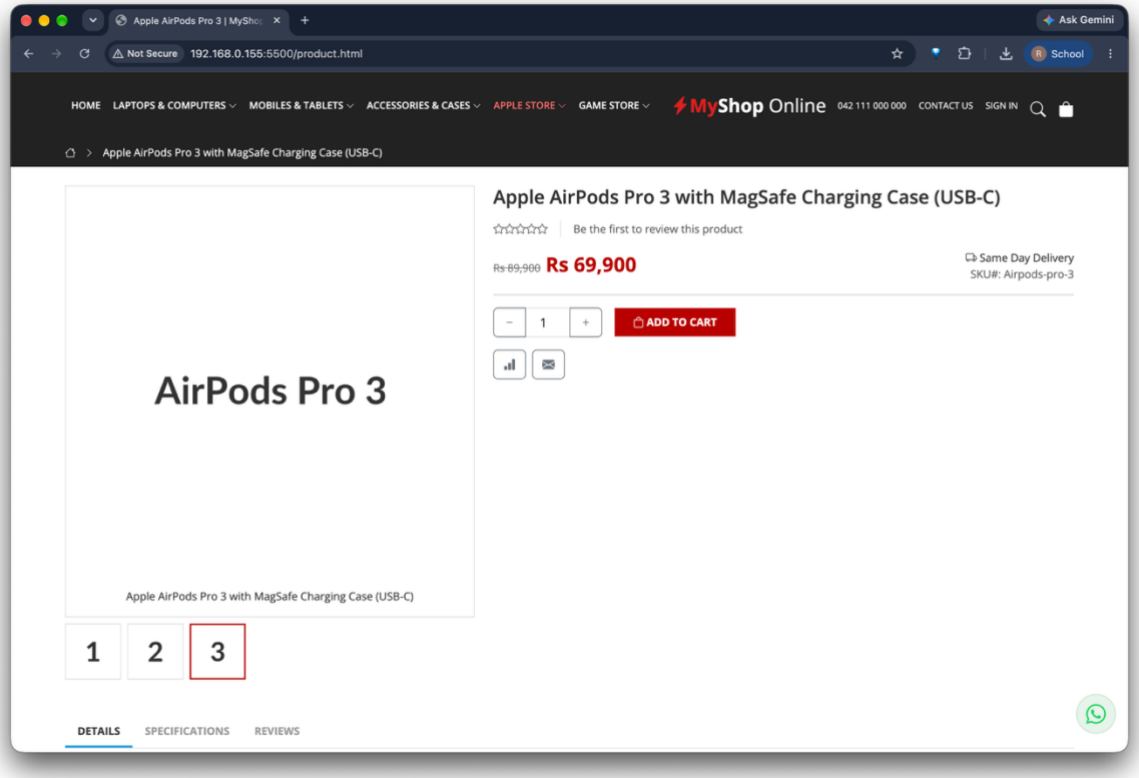

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An "About Me" section.
- An "Education" section listing your academic history in a semantic list or table.
- A "Skills" section.
- A "Contact" section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not inline `style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.
